

NORSPACE WINS ORDER FROM SPACE SYSTEMS/LORAL FOR THE THOR 7 SATELLITE

Norspace AS has won an order from Space Systems/Loral (SS/L) for delivery of Telemetry Command and Ranging (TCR) products for the Thor-7 satellite that SS/L is building for Norway's Telenor Satellite Broadcast. Under the contract, Norspace will supply Telecommand Receivers, Telemetry Transmitters and Beacon

Transmitters. This is Norspace's largest order so far for TCR equipment for a commercial telecom satellite. Previously, Norspace has won orders from SS/L for delivery of TCR equipment to six SS/L-built satellites.
